

## FMILOTA140LB MILO

The MILO line, designed by Guillaume Delvigne, consists of coffee tables and a pedestal table, available in oak and lacquer. The tabletops of these pieces appear to float above their central base, creating a sense of perfect balance while enhancing the objects they display. With generous thickness, they feature subtly curved ends that gracefully glide towards the floor, reminiscent of water flow. This gentle and fluid curvature gives the line an organic and architectural look, adding both a feeling of delicate movement and distinctive visual character through the interplay of light on the material. Crafted with respect for traditional woodworking and lacquering craftsmanship, this line highlights the beauty, the richness of the materials and seamlessly complements any decor.
